

# Comparing KIN Speakers

## KIN Mini Flex

## KIN Flex

**KIN Flex replaces the original and provides many significant upgrades.**

**Dimensions:** Original Flex dimensions are (WxHxD) 13.5" x 5.6" x 4.4" / 34.3 x 14.2 x 11.2 cm. New Flex dims are (WxHxD) 14.55" x 5.11" x 4.21" / 37 x 13 x 10.7. The new Flex is **1 inch/2.54cm wider, ½" / 1.2 lower, and .2"/.5cm shallower**, making it **lower profile and easier to place, particularly under TVs.**

**Tweeter:** Original Flex had a ¾" soft dome.

New Flex has a **1" titanium infused soft dome**. The soft dome material exhibits **characteristic smoothness** while the added **titanium** element imparts **highs that are detailed, airy, and extraordinarily lifelike.**

**Woofers:** Original Flex employed **4" MHEX woofers.**

New Flex features a **4" KIN Natural Hybrid**. The customized 4" natural hybrid woofer is composed of paper for its acoustic advantages and treated with a polymer to reinforce its strength and increase its lifespan. **Bass is powerful, fast, and musical.**

**Bass:** Original Flex dropped to **120Hz.**

New Flex drops to **95Hz**, an astounding **25Hz lower.**

**Options/Accessories:** Beyond the included wall bracket, original Flex had **no additional accessories.**

New Flex includes angled adhesive pads that can be added to hold Flex perfectly parallel to the wall, improving dispersion when mounted vertically in stereo or LCR configurations.
