Understanding the differences to match the right speaker to the right system

SKY TOWER

Hawk

Discover Yours: **SKY Tower** was designed to have the **widest broadband appeal** for today's extremely varied world of consumers. Warm sounding and well rounded, Sky **harmonizes with any system** and **satisfies the music lover, movie enthusiast, and gamer alike.**

Hawk's powerful, soul moving performance addresses the **discerning listener.** Hawk doesn't require the most powerful amplification but when **paired to reference level electronics, it delivers reference level performance.**

Impedance: **Hawk** is a **6 Ohm** load and **prefers powerful amplifiers.** **SKY Tower's easier 8 Ohm** load makes it **appropriate for a wider variety of electronics,** from powerful amps to surround receivers.

Woofer: **SKY Tower's** woofer is a **5.75" underhung** design where the voice coil **remains in the magnetic field throughout its entire excursion** and plays down to **36Hz.** **Hawk's 5.5" extreme long throw** woofer and **patented magnet system** allow Hawk to descend lower, to **32Hz.**

Tweeter: **SKY Tower's 1.3" soft dome** tweeter lends a **smooth, compassionate charm** to all sources and material. **Hawk's 1" allow dome,** housed in a rear chamber, is **sharp, accurate, and extremely detailed.**

Connectors: **Sky Tower** has two sets of terminals for bi-wiring or bi-amping. **Hawk** does as well, but uses **gold plated WBT terminals** to capture the purest signal.

Claw decoupling: **SKY Tower's Claw** is made of a **high-density composite.** **Hawk** includes the original, **polished aluminum version.**

Magnetic grille: **Included** with the **SKY Tower,** an option with Hawk.
