KIN IW

In – Wall Speaker

It's a perfectly proportioned pair of potent primary channels. It's a compact and convenient center channel. It's a superb sounding satellite for surround systems. Whatever the application, **KIN IW** will step up and deliver with powerful precision and astounding accuracy.

KIN IW is equipped with many features that installers greatly appreciate. Robust steel buttressed framework handles the toughest, most challenging situations. Screw cut-outs in the framework allow flush-to-stud installations where clamps cannot deploy. Dozens of magnets securely grip the grill preventing annoying resonance and unsightly gaps.

KIN IW features even more for the audio enthusiast. 4" MHEX Phenolic Honeycomb Woven Hybrid woofers develop powerful and perfectly tuned bass. The 1" Titanium Infused Soft Dome counterbalances them perfectly with precise and pure high frequencies. An Integrated wood back box ensures reliable and superior performance while providing thorough sound isolation.

KIN Architectural IW was conceived to be ultra-flexible, ultra-compact, and ultra-capable.

Proprietary MHEX Phenolic Honeycomb Woven Hybrid Woofer

Proprietary Titanium Infused Soft Dome Tweeter

Specifications

Design:	Full back-boxed, high-performance loudspeaker.

Impedance:	6 ohms
Sensitivity dB @1W-1M:	90 dB
Dimensions (w x h x d):	15.27" x 7.09" x 3.75" / 388 x 188 x 95.5 mm
Cut Out:	14.56 x 6.37 / 370 x 161.8 mm
Grille Type:	Magnetic, paintable, virtually bezel-less white metal
Accessories /options:	Pre-construction brackets
Speaker Terminals:	5-way gold plated

Huge Dispersion

KIN Architectural disperse at 75 degrees, almost twice as broadly as competitive speakers. Acoustic coverage is totally present throughout the entire listening area. The enormous dispersion allows the listener to enjoy the same sound whether seated or standing, simplifying placement.

Micro-Perf Grill

The almost bezel-less design only adds 4 mm in total width. Micro-perforations provide a uniform look without showing what lies behind.

Pre-Construction Kit

As the KIN Architectural models are all quite substantial, the kits are equally robust. Frames and wings aren't plastic, they're made of metal.
