The spirit of Totem's first speaker, the Model 1, lives within every model but despite the similarities to the designation, the Signature One is not a "comeback" It is an elevated, advanced monitor loudspeaker reflecting the progression of Totem's engineering prowess and it is primed to knock you out.

SIGNATURE ONE

The purpose of the Signature One was to epitomize what Totem set out to accomplish and provide to our loyal followers. It's a transcendental listening experience that transports a listener right into the event or medium, placing you intimately within the studio and among the artists, or makes you part of the crowd if it's a live recording. It's involving, embodies the Totem experience, and the perfect way to celebrate our 30th anniversary.

As quoted on one of the many reviews:

The Signature Ones' quickness, transparency, and flow drew my attention... sounded so good, it made me stop and take notice. The Totem Acoustic Signature One has an appealing, easy flowing musicality that retains most of the monitor-like accuracy that made the original Model 1 a respected design that endured for 30 years. Highly recommended. Stereophile.

About Totem Acoustic

Created in 1987 and celebrating our 30th anniversary, Totem's mission is to develop loudspeakers capable of reproducing a truly involving performance. Our goal is to provide designs that are affordable, cosmetically timeless, and invoke an emotional response. Music, movies, TV, and video games are accurately rendered with a powerful focus that is yet soul stirring. totemacoustic.com

Features

GIGANTIC LIFESIZE IMAGING capabilities
