Design Finishes

Dusk

Ice

Each Element model features Totem's own 7-inch Torrent™ hand-assembled drivers utilizing machined precision fit and finish, as well as revolutionary magnetic technology found only in the Element Series.

The starting point for this revolutionary magnetic application was to make the Totem Element series utilize absolutely "no active or passive cross-over parts" in the woofer section. Once resolved this tremendous challenge offers substantial advantages in clarity and phase correctness with remarkable control and striking accuracy both on and off axis. Totem realized that this crossover-free network in the woofer path allows for an unfettered flow of information, sound, and energy, resulting in a real musical experience.

The Element Series is designed to integrate seamlessly with the Tribe Series, for stunning synergy in surround setups.

Magnetic grill included.

Dimensions

Width	11.7" / 29.8 cm
Height	39.5" / 100.33 cm
Depth	15.4" / 39.12 cm

Specifications

Frequency Response	31 Hz - 22 kHz
Impedance	8 ohms
Recommended Power	50 W - 200 W
Sensitivity	88 dB
